Chess Mazes

Chess Mazes

In the fall of 2004, popular chess author Bruce Alberston released a book called *Chess Mazes*, designed to help students to develop their visualization and planning skills. *Chess Mazes* was an instant success and **ChessCafe** was delighted when Bruce agreed to offer a new *Chess Maze* puzzle each week.

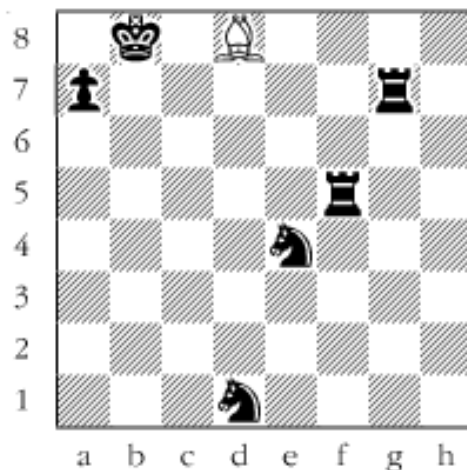

The concept is simple enough: The object is to place the black King in check in the shortest number of moves. The one restriction is that the white piece may not put itself *en prise*, i.e., on a square where it can be captured.

For those who may be interested in a more detailed introduction and overview to these puzzles, we invite you to take a look at the introduction from Bruce's book. Click [here](#) to read more, otherwise, we hope you enjoy this week's *Chess Maze* puzzle...

A Bishop Maze

The goal is to check the black king in the fastest way. Black can't move except if you put your *maze bishop* where he can take it. So don't do that.
