## Chess Mazes

In the fall of 2004, popular chess author Bruce Alberston released a book called *Chess Mazes*, designed to help students to develop their visualization and planning skills. *Chess Mazes* was an instant success and **ChessCafe** was delighted when Bruce agreed to offer a new *Chess Maze* puzzle each week.

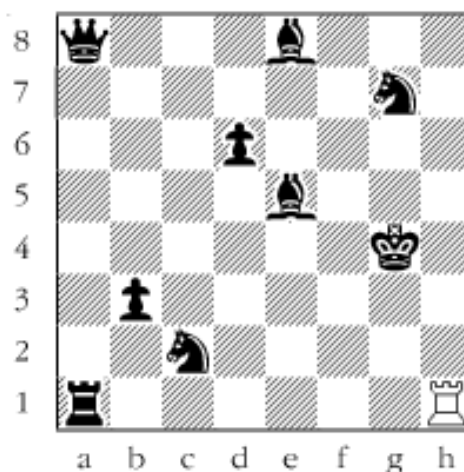

The concept is simple enough: The object is to place the black King in check in the shortest number of moves. The one restriction is that the white piece may not put itself *en prise*, i.e., on a square where it can be captured.

For those who may be interested in a more detailed introduction and overview to these puzzles, we invite you to take a look at the introduction from Bruce's book. Click [here](#) to read more, otherwise, we hope you enjoy this week's *Chess Maze* puzzle...

## A Rook Maze

Place the black king in check with your rook. Black doesn't move so you can make lots of consecutive moves with the rook till the check arises. Just don't put the rook on a square where it can be taken. And try for the shortest solution.

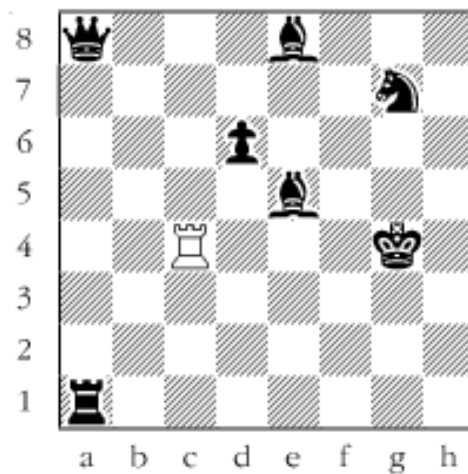

#38

*Scroll down for the solution*

The two undefended units at b3 and c2 must be captured after which check falls into place. 1. Rh8 2. Rf8 3. Rf2 4. Rd2 5. Rd3 6. Rxb3 7. Rd3 8. Rd2 9. Rxc2 10. Rc4+

**#38a**
